## Backup for Microsoft 365

Microsoft follows a 'shared responsibility model', where they are responsible for the underlying architecture and you are responsible for protecting your own data. Microsoft's data retention is limited – providing only 93 days of retention. Microsoft 365 does not automatically include a complete backup and recovery strategy. In fact, Microsoft recommends a third-party backup solution.

Effective data protection requires a dedicated backup and retention solution that delivers separate and immutable data backups.

**Safeguard your critical data in Mailboxes, OneDrive, SharePoint and Teams, from ransomware, accidental deletion, corruption, and other data loss incidents with Metallic Backup and Recovery for Microsoft 365.**

### KEY BENEFITS

|                                                                                                                                                                                      |                                                                                                                                                                       |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <p><b>Enterprise grade data protection across Exchange, Teams, OneDrive, and SharePoint.</b></p> |  <p><b>Fast automated, silent data backups with flexible granular restore.</b></p> |
|  <p><b>Isolated, air-gapped backups from production data.</b></p>                                 |  <p><b>Advanced privacy and security protocols built-in.</b></p>                   |
|  <p><b>Unlimited storage and infinite data retention with no egress fees.</b></p>                 |  <p><b>Cost effective Pay per user, Per Month, with no upfront investment.</b></p> |

**BMBE's Backup solutions include easy onboarding, ongoing monitoring and recovery supported by our team of data management experts with 24x7 in country support.**
