

6 REASONS YOU NEED A DEDICATED DOCUMENT SCANNER

Canon

Scanning frequency

For business processes requiring frequent scanning, a dedicated Canon document scanner delivers significant productivity benefits over alternative methods.

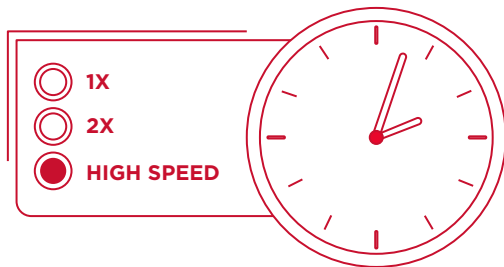

Volume of scanning

There is no alternative to a dedicated document scanner when it comes to high volume demand. Canon document scanners have been designed to do just that – provide uninterrupted, high quality scanning of large numbers of documents to support your business needs

Media complexity

Canon document scanners have been designed for easy scanning of a wide range of media. Be it size, weight or special material a dedicated scanner can cope with all of these. A dedicated scanner will also help make damaged, creased or faded documents more legible.

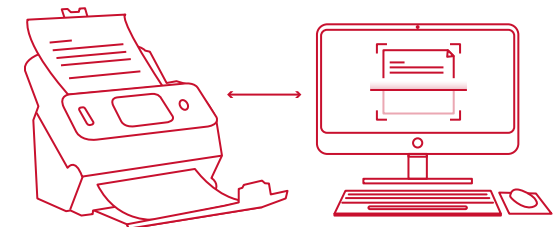

Scanning Speed

Speedy access to information is critical for any business. Canon document scanners offer a full range of scanning speeds to suit your need in the most efficient and flexible way. For high speed scanning and quick data extraction a dedicated scanner is always the best option.

Importance of scan quality

Canon document scanners have been designed to provide the highest possible scan quality. Supported by sophisticated scanning software, they allow the capture and extraction of relevant information for further processing. Therefore, even low quality documents can be scanned into a high quality digital file.

Ability to review output

Unlike other scanning devices, Canon document scanners can be directly connected to your computer. This means you can immediately see the scan on your screen and make any necessary amendments or adjustments. Significantly reducing the need to re-scan, and improves productivity and quality of the data captured.
