

Evaluating the fi-8150 and the fi-8170

RICOH
imagine. change.

Next-level scanning with the flagship model in the fi-8000 series

From industry-leading image quality and standout reliability, to unrivalled speed and superior capability, the fi-8170 stands alone as the high performer in our fi-8000 series of scanners. Redefining the standard for business scanning, the fi-8170 gives small and large organisations unparalleled productivity, no matter how demanding their workflows may be.

Paper protection function

With its advanced image monitoring and sound detection (iSOP), the fi-8170 protects a wider variety of document types, faster and more reliably.

Document detection sensors

The power of the fi-8170's 16 sensors mean that document overspill is detected immediately, overcoming the possibility of content loss or having to rescan.

Passport scanning

With no need for carrier sheets, the fi-8170 can easily scan passports, booklets and thick notebooks – such as passbooks and pension handbooks – just as they are.

Operation panel

The fi-8170's LCD panel enables intuitive operation for scanning with confidence, eliminating operating errors.

fi-8150

fi-8170

Paper protection function	Image monitoring	Image monitoring + Sound detection (iSOP)
Document detection sensor	8 locations, Pick sensor ×4, Read-top sensor ×4	16 locations, Pick sensor ×4, Read top sensor ×4, Skew sensor (left/right) ×8
