

Creating collaborative business environments

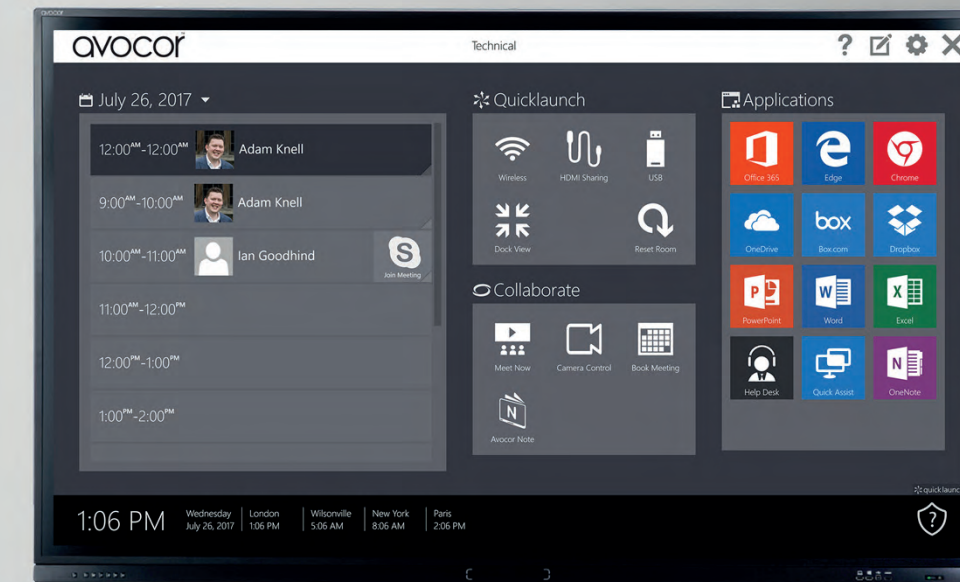

The world of work is changing....

It seems like everyone is talking about collaboration these days and how can we improve customer experiences, enhance cross-team engagement and increase productivity through collaboration.

Avocor create flexible, affordable, interactive touchscreens that help to unify in-room and remote collaboration experiences, ideal for every workspace and budget.

Our intuitive solutions are designed for the huddle room to the conference area, our platform agnostic solutions enable customers to build the exact collaboration environment that integrates seamlessly with existing hardware and software as well as any future upgrades, maximising your return on investment.

Enhance Group Collaboration

Incredibly innovative, Avocor display solutions include Avocor Intelligent Touch, delivering a superior writing experience that is as smooth as putting pen to paper. Fast and precise, our displays differentiate easily between pen, finger and palm, creating a fluid collaboration experience for all.

Improve Team Engagement

With the mobile workforce number continuing to rise, Avocor displays help engage remote workers by connecting them through voice, data and video platforms from Zoom to Skype for Business - whatever the platform, Avocor solutions will integrate beautifully.

Crystal-Clear 4k Clarity

With 4K screen resolution, users will enjoy stunning image clarity that creates a truly immersive visual environment that engages the audience, instantly.

Enjoy Ultimate Flexibility

Because our solutions are based on an open architecture, you can create a custom collaboration platform that meets your exact requirements and needs while the Intel approved OPS slot ensures your investment is upgradeable to provide additional security and storage.

Collaboration For Every Space

With 3 sizes available, Avocor has a solution for every space, from the huddle room to larger conference environments, all affordable for any budget.

A Range Of Connectivity Options

Avocor solutions are built with ease of use in mind, from front of display control bars to a wide selection of inputs at the back of the panel, you will never be short of connectivity options.

Productive Software Suite

All Avocor displays come with Avocor Note by Nureva, our intuitive whiteboarding application that includes a comprehensive range of interactive tools. With a selection of backgrounds, images and icons, the software enables every user to create professional looking content, instantly.

Small camera. Big experience - the **Huddly GO** provides an outstanding impact, straight out of the box. Plug and play, the 150o ultra-wide lens lets you capture everyone in the room, transforming even the smallest space into a high quality conference room.

zoom

Zoom video conferencing features wireless content sharing, high-quality video and audio conferencing and integrates with popular calendar systems that works seamlessly with the Avocor display to provide a visual collaboration experience.

Manage every element of the meeting straight from the display with **QuickLaunch**, the simple yet secure interface that provides multi-platform integration to create a one-click meeting environment. Join meetings, start applications, access data and share content, all from one place.

Nureva Span enables you to create physical and virtual collaboration spaces that make it easy for groups to collaborate on a virtual, endless canvas, regardless of location, while the HDL300 audio conferencing system works with the majority of UC platforms to ensure that everyone can be heard no matter where they are in the room.

Designed to be the perfect control interface, the **Mimo Vue HD** with built in HDMI capture capability provides the ultimate conference room solution and enables users to share and stream high quality HDMI content, quickly.

Our open and agnostic approach means that creating a unique collaborative workspace has never been easier.
