Today's agenda

1. Introductions
2. Consumerization
3. Compliance
4. Computation
5. What Next?

**“Any sufficiently advanced
technology is indistinguishable
from magic.”**

– Arthur C. Clarke

Consumerization

- What do we mean?
- How does it affect AHP members?
- What can/should you do?

You and your team must acknowledge relative deprecation, manage expectations, push for investment, and get the most of what you have.

Compliance

- What do we mean?
- How does it affect AHP members?
- What can/should you do?

You and your team need to keep up with policy and regulatory changes, align/liase/persuade compliance office(r)s, and optimize the risk-reward situation.

Computation

- What do we mean?
- How does it affect AHP members?
- What can/should you do?

You and your team need to know what drives results for your team, explore and experiment thoughtfully, establish governance and practices to channel enthusiasm.

Putting all three Together to Prepare for the Future

- Compliance
- Computation
- Consumerization

- Plan
- Invest
- Train/Upskill
- Negotiate
- Monitor

Thanks!
