Woodmark benchmarking survey FY22

Thank you for participating in Woodmark's benchmarking survey for fiscal year 2022. This survey represents the 27th annual collection of benchmarking data by Woodmark members. Based on the input of you and your colleagues, the survey workbook has been improved and some questions have been refined.

Notable dates and deadlines

Friday, Feb. 17 - completed surveys are due for shops whose fiscal year ends 12/31.
Friday, Mar. 3 - completed surveys are due for shops whose fiscal year ends 11/31.

Data submission process

This Excel file serves as the reporting mechanism for the FY22 data. Where appropriate in the workbook, formulas have been included to provide strain relief for other calculations. In the Excel workbook, these fields are highlighted in light green. Fields that require data input from your team are highlighted in light blue. Those fields with a drop-down menu to choose from are in purple. When completed, save the file with your shop's location in the file name and email to Rona Pryor, Woodmark's director of research and insight at rona@woodmark.org. If you are unable to email it, please contact Rona to arrange file transfer.

Workbook instructions

- Columns with instructions or question text have been protected and may not be altered. You may make notes in the columns to the right of the questions and formatting/validation prompts.
- Fields requiring specific formatting have prompts beneath or to the right of the field that indicate whether allowable responses have been entered. When the response is valid, the prompt will read, "Okay."
- The workbook contains verification fields, highlighted in dark green. These indicate whether a response is valid based on a prior response or an expected value.
- You have the ability to adjust the heights and widths of all columns and rows.
- The final sheet in the workbook collates all of your responses. This sheet will be used to transfer your responses to Woodmark's database. The sheet is protected; you cannot alter the data on this sheet.

For reference only - please submit your data in the Excel workbook.

Annual survey

- 130 questions
- 600 data points
- Data collected over four months
- Covers all constituencies at all levels of giving
- Includes all business lines from annual to principal giving
- Captures inputs – FTEs, costs, numbers of solicitations
- Includes outputs – numbers of donors and gifts, total revenue raised.
- Submitted in a formatted Excel file

Yale University	Paul Mellon	\$47 million	1967
Univ. of Texas Southwestern Medical Center	Harold C. Simmons	\$41 million	1988

Source: *The Chronicle of Higher Education*

By ANTHONY DePALMA

In a tale of love and money, John J. Moores and Rebecca Baas of Sugar Land, Tex., were high school sweethearts who struggled to make it through the University of Houston in the 1960's and then made it big with their own computer software company.

Now quite wealthy, the Mooreses have given their alma mater a total of \$51.4 million this year, the largest donation ever made to a public university in the nation.

"If the university had not been in Houston, it is highly doubtful that either one of us would have gotten a degree," said Mr. Moores, the 47-year-old founder and chairman of BMC Software Inc. "We are very grateful and wanted to help the school and help people who are like us, going to school part time."

The Mooreses have made eight donations in 1991 that total \$51.4 million. They include \$25 million to build a new athletic building and renovate existing sports fields; \$11.5 million to the university's College of Optometry, which runs the River Blindness Foundation, and \$10.2 million to build a new concert hall for the School of

Music. Other, smaller grants went to support superconductivity research, a creative writing fellowship program, library improvements and scholarships.

"When my wife and I were undergraduates, we used to share the thought that someday perhaps we could help one or two students get through college," Mr. Moores said. "We never dreamed we'd be able to do something like this as quickly as we have. But it's fun."

Tough Times Still Ahead

Even with a record donation, the University of Houston, which is state-financed, faces difficult economic times. Tuition at the 33,000-student university is scheduled to increase next September to \$20 per credit hour, from \$18. Average costs this year for tuition, room, board and fees is \$6,400.

Most states cut their higher education budgets this year, forcing many public universities to raise tuition and cut costs. The president of the University of Houston, Dr. Marguerite Ross Barnett, said the Mooreses' donations represent a new trend in higher education, in which state-financed universities are turning increasingly

to private support from alumni, corporations and foundations.

"You're going to see more convergence," Dr. Barnett said. Private schools, she said, "are looking to public sources to support scholarships and the publics will be pursuing more private university strategies to maintain appropriate levels of funding."

Large private contributions once were the sole province of the wealthy and well-established private universities, like Harvard, Yale and others in the Ivy League, whose graduates often went on to successful and lucrative careers. Of the 10 top contributions made to higher education since 1967, all but two have gone to private institutions. Public universities were considered to be well taken care of by public money.

Change Over the Years

But in recent years, as the publicly supported universities improved and state support withered, graduates who have increasingly taken their place at the head of profitable businesses have made substantial donations.

John Moores and Rebecca Baas met in their American history class

married at the end of their freshman year at the University of Houston, where they were part-time commuting students, working and studying at the same time. By the time they graduated in 1970, each with a degree in economics, they had two children.

Mr. Moores went to work for I.B.M., then for the Shell Oil Company, where he noticed that the company's big main-frame computers were sometimes agonizingly slow. He developed programs to speed them up and, in 1978, went to work for himself, developing new programs to increase the speed and efficiency of existing computers. In 1980, with \$1,000 in a Houston bank account, Mr. Moores started his company, BMC Software.

It now has 41 different programs and is a \$90-million-a-year business with customers like C&S, Pizza Hut and other Fortune 500 corporations.

Mr. Moores said he decided to make the donations now, rather than after he had retired, because he was interested in seeing how the money would be used.

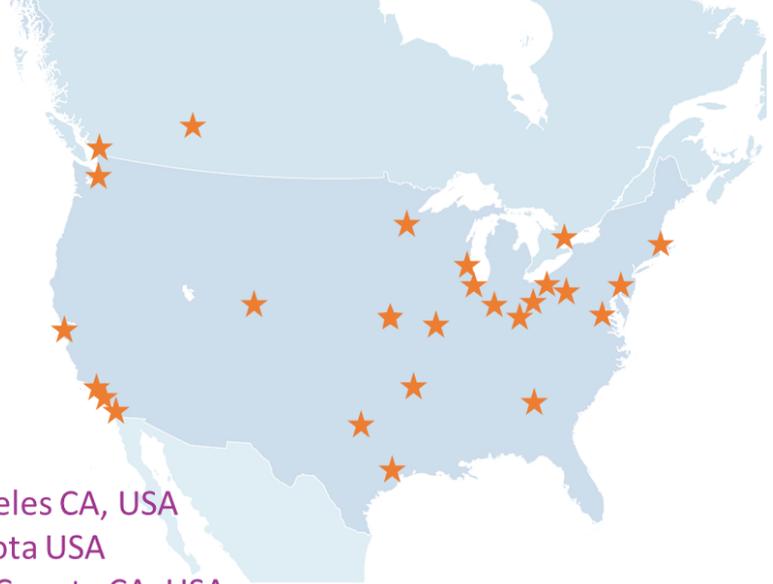

"We always thought it would be kind of fun to watch the buildings go up," he said, "and frankly we intend to do more through the years."

Members' five largest gifts by size and frequency

Woodmark tracks the five largest gifts ever received by each member. This list includes 137 gifts ranging in size from \$3M to \$300M. The gifts in the list were received between 1987 and March 2022.

Five largest gifts ranges

When the list of members' five largest gifts is sorted into four groups with roughly the same number of gifts in each group, you can see that *the frequency of members receiving a qualifying gift is accelerating*. The number of years in which the first 34 gifts on the list were received is 21 years; the number of years for the most recent 35 gifts is 2.5 years.

Time Period (CY)	Number of years	Number of gifts	Median gift size
1987 - 2007	21	34	\$20M
2008 - 2015	8	35	\$25M
2016 - Q3 2019	3.75	33	\$20M
Q4 2019 - Q1 2022	2.5	35	\$15M

It's not what you look at that matters, it's what you see.”

- *Henry David Thoreau*

Q4 performance measurement plan

Objective/Measure

1. Gifts Closed (Dollars)
2. Solicitations submitted (Number)
3. Face to Face Visits (Number)
4. Teamwork/Special Projects/Working Relationships
5. Solicitations Funded (%)
6. Prospects added to Pipeline (Number)
7. Total Contacts (Number)

Points (Meet 100% Goals)	Points (Maximum)	FY Goal	FYTD Goal (Q1,2,3,4)	FYTD Actual	% FY Goal Achieved	Points Earned
30	50	\$3,992,201.00	\$3,992,201.00	\$9,527,646.84	239%	50.0
20	25	71	71	73	103%	20.6
20	25	194	194	76	39%	7.8
10	15	10	10	13	130%	13.0
10	15	38%	38%	82%	215%	15.0
5	10	12	12	2	17%	0.8
5	10	540	540	339	63%	3.1

Total Points 110.4

Points Earned Guide

	Q1	Q2	Q3	Q4
Did Not Meet Expectations	<19	<38	<56	<75
Needs Improvement	19	38	56	75
Meets Expectations	25	50	75	100
Exceeds Expectations	31	63	94	125
Exceptional Performance	38	75	113	150

It's your turn

If you want to go fast, go alone. If you want to go far, go together."

- *African proverb*
