

Where SLPs get evidence for clinical practice

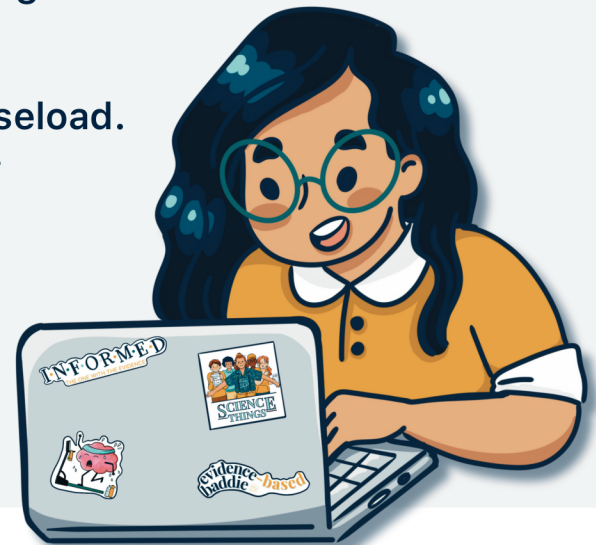

SLPs need to **know the evidence** for best practice and be able to find it fast.

The Informed SLP team reads **400+ research articles** published across the scope every month to give SLPs clinically-actionable treatment and assessment skills in our research reviews.

How we make SLP life easier...

- No more outdated CE libraries. Our searchable database makes it easy to find effective, up-to-date information on topics like **dysphagia** or **dementia** the latest treatments for **rare diagnoses**, and **strategies for collaboration with the medical team**.
- Never lose information that is important to **your caseload**. Bookmark reviews and save them to folders in your personalized library.
- No more hour-long continuing education courses. We track **by the minute**. Simply earn credit by answering a question after reading or listening a review.

A little intro to our database...

The screenshot shows the InformedSLP database interface. At the top, there is a search bar labeled 'Search Reviews' and navigation tabs for 'Issues', 'Sections', and 'Topics'. Below these, a callout box says 'Use filters to find what you need'. The main content area displays a review titled 'The complicated course of head and neck cancer survival' under the categories 'HEAD AND NECK CANCER' and 'ADULTS'. A 'Review' button is next to the title. A callout box says 'Save reviews to folders for quick access later'. Below the title, there is a play button icon and a callout box that says 'Audio so you can learn on-the-go'. The review text begins with 'Beating the disease was the first hurdle but patients navigating radiation fibrosis syndrome need SLPs to know the best practices in post-radiation management.' Below the text, it shows 'January 2024', '2 comments', and '11 minutes'. A callout box at the bottom right says 'Earn 11 CE minutes for reading this research review'. On the right side, there is a callout box that says 'Download clinical resources that make your practice easier' with an arrow pointing to a thumbnail image of a clinical resource document.

How we make management easier...

- When your clinicians use the most up-to-date practices, you'll benefit from **improved patient outcomes**, more **appropriate referrals**, and **timely discharges**.
- We create **assessment and treatment materials** from the research, so your SLPs can easily apply the evidence in their clinical care.
- Your clinicians can provide high-quality care for ALL the patients on your census. We cover the **full SLP scope of practice**, including:
 - Swallowing disorders
 - Head and neck cancer
 - NICU and PICU care
 - Stroke and TBI
 - Caregiver education
 - Ethics and DEI
