

Where SLPs get evidence for clinical practice

SLPs need to **know the evidence** for best practice and be able to find it fast.

The Informed SLP team reads **400+ research articles** published across the scope every month to give SLPs clinically-actionable treatment and assessment skills in our research reviews.

How we make SLP life easier...

- No more outdated CE libraries. Our searchable database makes it easy to find effective, up-to-date information on topics like **AAC or Autism** the latest treatments for **rare diagnoses**, and **strategies for collaboration with teachers and caregivers**.
- Never lose information that is important to **your unique caseload**. Bookmark reviews and save them to folders in your personalized library.
- No more hour-long continuing education courses. We track **by the minute**. Simply earn credit by answering a question after reading or listening a review.

A little intro to our database...

The screenshot shows a search interface for 'Speech Sound Disorder' reviews. Callouts highlight the following features:

- Search Reviews**: A search bar at the top.
- Use filters to find what you need**: Points to filter options like 'Issues', 'Sections', 'Topics', 'CE Available', and 'Clear Filters'.
- Add reviews to folders for quick access later**: Points to a plus icon next to the 'Review' button.
- Listen to or print research reviews**: Points to play and print icons.
- Everything you want to know about treatment approaches for speech sound disorders**: Points to the review title.
- From Van Riper to Cycles, Complexity to Core Vocabulary, and everything in between: this high-speed review of evidence-based intervention for SSDs is like squeezing a semester into a half-hour.**: Points to the review description.
- Clinical resources included with this research review**: Points to a thumbnail image of a document.
- The CE minutes you can earn by reading this review**: Points to the 'Expand +' button.

How we make management easier...

- When your clinicians use the most up-to-date practices, you'll benefit from **improved client outcomes** and more **appropriate referrals**.
- We create **assessment and treatment materials** from the research, so your SLPs can easily apply the evidence in their clinical care.
- Your clinicians can provide high-quality care for ALL the children on their caseload. We cover the **full SLP scope of practice**, including topics like:
 - Deaf & Hard-of-Hearing
 - Dysarthria
 - Cleft Palate
 - Stuttering
 - Language Disorders
 - Ethics and DEI
