

# Where SLPs get evidence for clinical practice

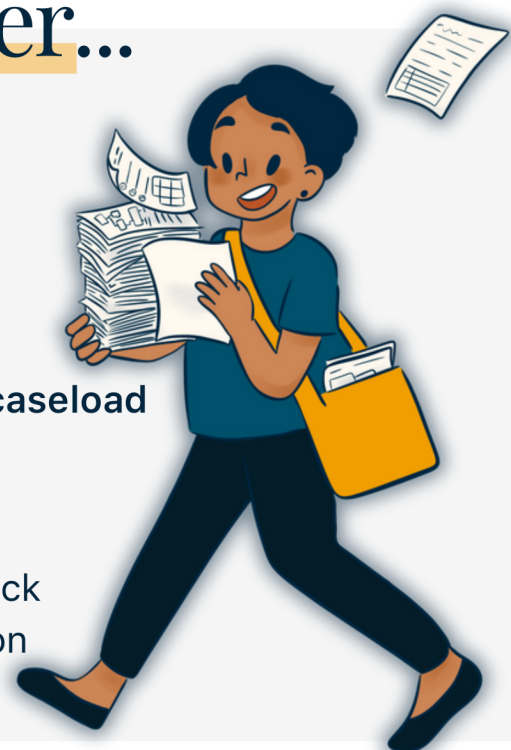

SLPs need to **know the evidence** for best practice and be able to find it fast.

The Informed SLP team reads **400+ research articles** published across the scope every month to give SLPs clinically-actionable treatment and assessment skills in our research reviews.

## How we make SLP life easier...

- No more outdated CE libraries. Our searchable database makes it easy to find effective, up-to-date information on topics like **play and feeding**, the latest treatments for **rare diagnoses**, and strategies for **collaboration with caregivers**.
- Never lose information that is important to **your unique caseload**. Bookmark reviews and save them to folders in your personalized library.
- No more hour-long continuing education courses. We track **by the minute**. Simply earn credit by answering a question after reading or listening a review.

# A little intro to our database...

The screenshot shows a search interface for 'Search Reviews'. At the top, there are filters for 'Issues', 'Sections', 'Topics', and 'CE Available' (with a checkbox), along with a 'Clear Filters' button and a 'Most recent' sort option. A callout 'Use filters to find what you need' points to the filter area. Below the filters, a callout 'Add reviews to folders for quick access later' points to a plus icon. The main content area shows a review titled 'PLAY • BIRTH THROUGH HIGH SCHOOL' with a 'Review' button, a plus icon, and a play button. A callout 'Listen to or print research reviews' points to the play and print icons. Below the title, the text reads 'Play through the ages: Early development and assessment' followed by a description: 'A look into the different stages of play, how to assess children's play, and the limits of our research base. Illustrated educational handout included!'. Below this, it says 'March 2024', '0 comments', '23 minutes', and an 'Expand +' button. A callout 'The CE minutes you can earn by reading this review' points to the '23 minutes' text. On the right, there is a thumbnail of a handout, and a callout 'Clinical resources included with this research review' points to it.

## How we make management easier...

- When your clinicians use the most up-to-date practices, you'll benefit from **improved patient outcomes**, more **appropriate referrals**, and **timely discharges**.
- We create **assessment and treatment materials** from the research, so your SLPs can easily apply the evidence in their clinical care.
- Your clinicians can provide high-quality care for ALL the patients on your census. We cover the **full SLP scope of practice**, including topics like:
  - Caregiver Coaching
  - Autism
  - Language Disorders
  - Dysphagia
  - Screening/Prevention
  - Ethics and DEI
