

# What is *EBPirl*?

A professional development opportunity, offered by The Informed SLP, LLC, designed to help speech-language pathologists (SLPs) bridge the gap between research and practice. EBPirl goes beyond typical programs by engaging participants in active learning, where they explore implementation science and apply research in real-world settings.

Through structured assignments, peer discussions, and practical tools, clinicians gain the skills needed to implement evidence-based practice (EBP), effectively, enhancing both individual skills and organizational outcomes.

## EBPirl Course Details:

- **Duration:** Five interactive online sessions over five weeks.
- **Facilitator:** Natalie Douglas, PhD, CCC-SLP, a leader in speech-language pathology and implementation science, who has extensive experience helping professionals translate research into practice.
- **Customizable:** While primarily designed for individual clinicians, the skills learned can be tailored to address specific organizational needs and challenges.

# How could EBP*irl* benefit your organization?

- **Improved Clinical Outcomes and Quality of Care:** Participants learn how to apply the latest research directly to their work, returning with actionable strategies to improve patient care and service quality, grounded in the most current methodology.
- **Increased Efficiency:** The course teaches strategies for streamlining workflows, reducing inefficiencies, and enhancing overall service delivery.
- **Professional Growth and Leadership Development:** Participants earn ASHA-approved CEUs (Continuing Education Units) while developing leadership and implementation skills preparing them to guide teams through evidence-based practice adoption and foster a culture of continuous improvement.
- **Sustainable Change:** With tools like the Plan-Do-Study-Act (PDSA) cycle, participants will be equipped to implement changes that lead to lasting improvements in their practice and organization.

## With EBP*irl*, employers can...

- Invest in both the development of their staff and the long-term success of their organization.
- Improve staff member's readiness to lead and implement sustainable evidence-based improvements and team collaboration.
