

## TRANSPORTABLE

Compact Mobility Creates Versatility: Developed with space-saving design to ensure the system accommodates various procedure room sizes, a variety of specialties, and overall maximum usage of your medical facility.

- Eliminate scheduling conflicts and the need for a dedicated room to help increase your facility's ability to treat more patients year-round.
- Leverage the swivel movement of the therapy head and small footprint lithotripter for storage and transport from room to room or location to location.
- Protect your investment from wear and tear during transit with the heavy-duty floor plates and pads of the Dornier Transport Kit.

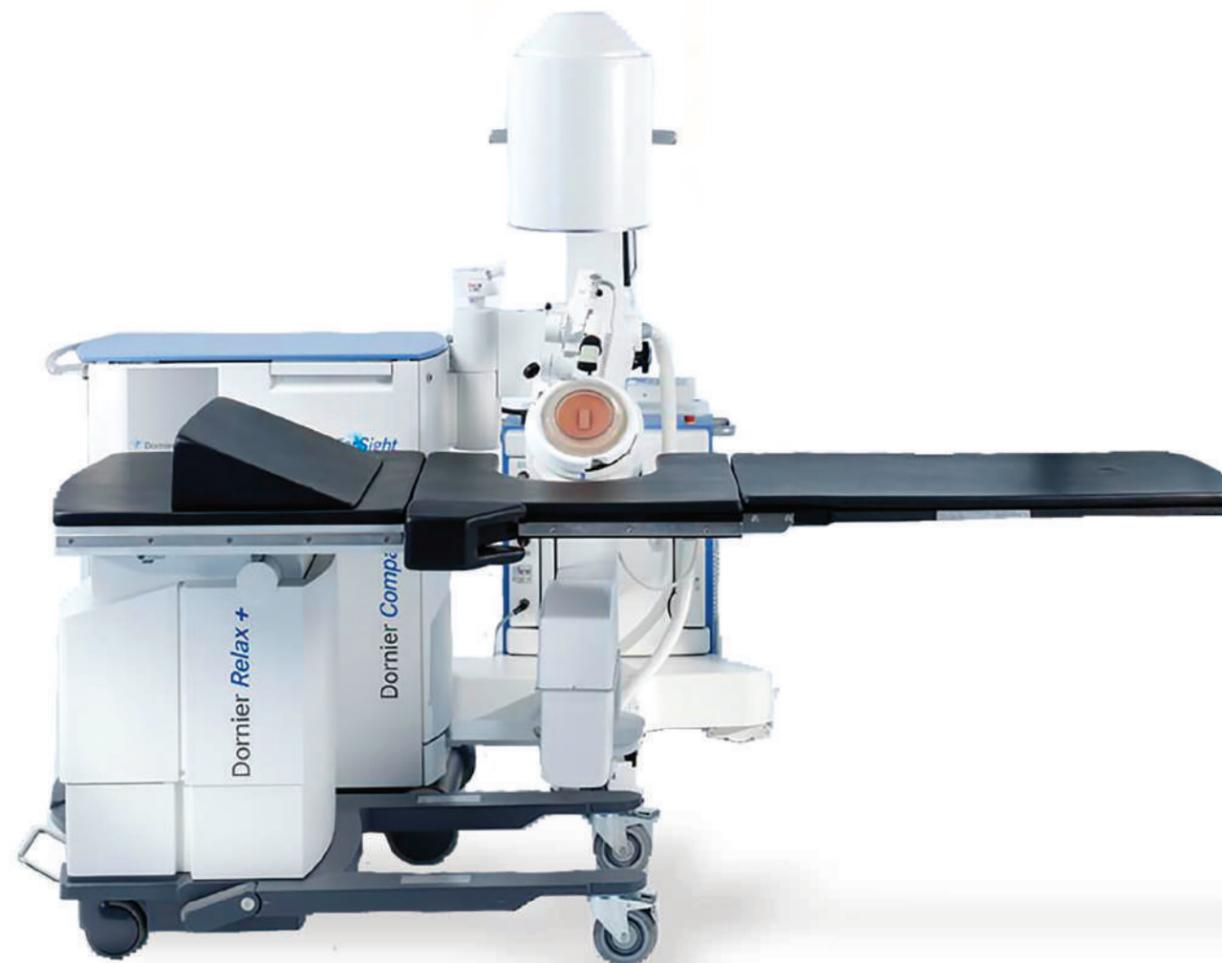

## DORNIER COMPACT SIGMA MODULAR LITHOTRIPTER

Dornier MedTech develops innovative and purposeful products designed to serve the needs of global hospitals, surgical centers, teaching universities, private and public urology practices, and mobile providers all across the globe.

The Compact Sigma is a truly versatile modular lithotripter. When combined with available options such as C-arms, ultrasound scanners, and a fully motorized patient table, this device easily becomes a multi-functional workstation.

## PRECISION

Targeting Made Easy: Designed to revolve around a single focal point, with the Dornier Compact Sigma, precise alignment can easily be achieved.

- Leverage a targeting system that includes laser pointers for easy transition from lithotripsy to cystoscopy procedures without re-calibration.
- Ease of alignment results in faster procedure preparation and potentially decreasing the patient's overall anesthesia time.
- Increased workflow efficiency reduces procedure time to allow physicians and facilities additional revenue potential from added cases per day.

## FLEXIBILITY

Easy Positioning and Compatibility for Treatment: Engineered to offer patient comfort while allowing the physician to manipulate and combine various devices for maximum results.

- Ensure patients are positioned supine for all treatments with the flexible over and under therapy head positioning.
- With the Relax +, leverage full range of capabilities that enable a variety of procedures to be performed eliminating any need to move the patient to another room or table.
- Maximize full scale lithotripsy performance with multiple C-arm compatibility and choice of X-ray or Ultrasound diagnostics.
