

WMS+Beas for Pharma – Process Manufacturing

Integration use case

Pains

Why did the customer need this integration?

The customer needed traceability on the production side and the logistics side of the business in order comply with regulations.

If a problem was detected in production, like wrong quantities or wrong components being included, **Beas could detect the batch number. But without WMS, they couldn't split the batch into the different logistic units.** They also lacked the view on whether the stock was being moved quickly enough into a cool zone when stored / without exiting cool zones.

The customer needed batch control between production and logistics, FDA Control, and to be able to choose the batch when the picklist proposal is created by Beas. **Produmex WMS allowed them to pick the batch but not to move it to a different customer order without Beas.**

So, to sum up, this pharmaceutical company needed:

- Help with compliance
- To digitally connect production with the warehouse

How did the integration help?

Gains

What were the results?

The combination of Beas Manufacturing and Produmex WMS was essential for this company to **comply with the regulations**, being able to **identify specific logistic units and batches**, or to **store stock properly** so the quality is not affected. It was also the **scalable solution** they needed, connecting production and logistics to allocate resources to different and unique customer orders.

So, what were the benefits?

- Allocating batches to customer order with quality status
- Flexibility on moving stock after picking
- Get product traceability through all the different stages
- Ensure clear material flows
- Never lose track of the batch expiration date and where each batch is being taken from or to

Boyum Learning

Vision

To inspire companies to achieve sustainable growth and a competitive advantage, now and in the future.

Mission

To be the most professional partner in our ecosystems and the most reliable supplier of hybrid value chain solutions that solve impactful business problems for SMEs

Values

We have a strong culture promoting core values of Family, Social, Fit, and Excellence.

Company's culture:
Energy for LIFE

FAMILY
SOCIAL
FIT
EXCELLENCE

Three-eight

A philosophy and a set of key principles that are deeply embedded in Boyum IT products and organization.

Eliminate all tasks that have no real value in your work.
If the process cannot be eliminated: Automate it.
If neither elimination nor automation is possible: Delegate.

This way of thinking enables Boyum IT, partners and end-customers to run lean and effective businesses by reducing unnecessary workstreams and processes.

eliminate
automate
delegate
