

## Is Compressed Air *Critical* To Your Operation? We service any make or model of equipment.

### Which Plan Is Right For You?

#### Flex Care

Preventive Maintenance Customized To Your Needs

#### AirCare Plus™ with Optional Remote Monitoring

Multi-Point Inspection

Preventive Maintenance

Lubricant Analysis, Vibration Monitoring, and Thermal Imaging

Routine Parts, Lubricant & Labor in 4 Quarterly Payments

Budget Friendly • Peace of Mind

#### Total Care

Bumper-to-Bumper Extended Warranty Coverage

All Parts, Lubricant & Labor in 12 Monthly Payments

## WHY TRUST BRABAZON WITH YOUR AIR?

**Air User?  
You Gotta  
Guy!**

“Our compressors are running great and we have been pleased with the air capacity upgrade that Brabazon completed. We are seeing a desirable cost savings on our energy consumption expense, and also less wear and tear on our compressors. It's nice to work with a company that backs their products and services.”

-John L., Minnesota Customer

**Our Commitment to You**

We don't just service equipment — we protect your operation.  
Our mission is simple: Identify issues early. Prevent downtime. Deliver peace of mind.

**Prevent Problems. Protect Production. Power Performance.**

*Is Saving a Few Dollars Worth the Risk of Downtime?*

When it comes to your compressed air system, the real question isn't the cost of service — it's the cost of failure. Just one unexpected breakdown between service intervals can easily exceed the total cost of preventive maintenance for the entire year. Lost production, emergency repairs, and operational disruption add up fast.

***Downtime is expensive.***

***It not only impacts your bottom line but your customers as well.***

**Why Preventive Maintenance Matters**

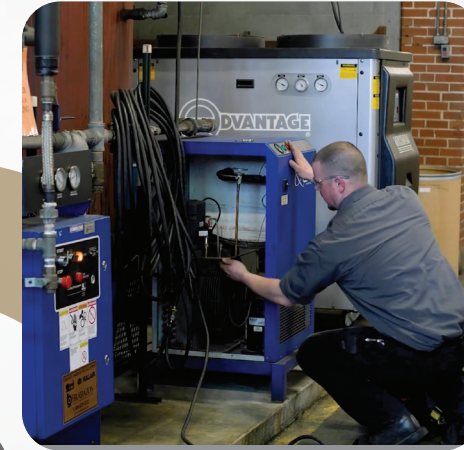

Your compressed air system is the backbone of your operation.

**Without proper maintenance:**

- Small issues turn into major failures
- Energy efficiency drops, increasing operating costs
- Equipment lifespan shortens
- Production becomes unpredictable

**Preventive maintenance ensures:**

- Maximum system uptime
- Improved energy efficiency
- Extended equipment life
- Reduced emergency repair costs
- Consistent, reliable performance

**Our Difference: A Deeper Level of Service**

**100-Point Inspection — Every Visit**

We don't just "check the basics." Our comprehensive inspection goes far beyond industry standards to ensure nothing is missed.

**Predictive Maintenance Technology**

- Advanced tools identify issues before they become failures:
- Vibration monitoring
  - Thermal imaging
  - Performance trend analysis

**We Find Problems Before They Find You**

**Highly Trained, Highly Qualified Technicians**

- At Brabazon, expertise isn't optional — it's required.
- Two dedicated in-house trainers
  - Fully equipped training center
  - Ongoing factory training programs
  - Mandatory certification testing for technicians

This ensures every technician working on your system is:

- Knowledgeable
- Certified
- Continuously improving

**Why Choose Brabazon?**

If you're looking for the cheapest, fastest in-and-out service...we're not the right fit.

If you're looking for thorough, proactive, and highly skilled service that prevents problems before they happen, that's where Brabazon stands apart.

**The Bottom Line**

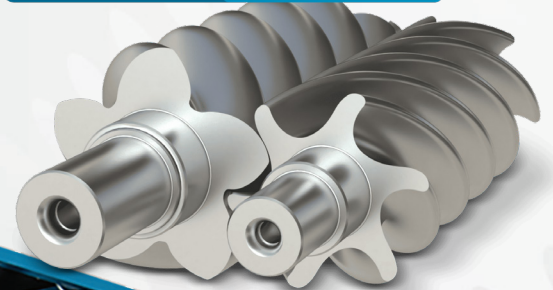

You can pay a little more for preventive maintenance... or pay a lot more for unexpected downtime.

Choose reliability. Choose expertise. Choose prevention.

**Choose Brabazon.**

**LIFETIME AIREND WARRANTY**
