

FULL  
OF  
CARE

# Is your dog's chew a tooth-breaker?

Your dog loves to chew, but not all chews care for your dog's teeth. In fact, some chews and toys made for dogs are so hard they can cause painful tooth fractures!

Dogs' teeth are softer than they seem. So, use this simple rule – if you wince at the thought of biting down on your dog's chew, it's probably too hard for their teeth.

**CHOOSE WITH CARE.**
