If anyone gets the chance to go to a workshop or counseling, I highly recommend it. You will learn more from Gray than any teacher I have ever met. You can't put him in a box, he is too big for that. There is something magical about him."

"The way you deliver your message is so different from other's seminars I have been because you are so direct, packed with information from minute one. I love all the tools that I now own forever and I can easily use them in my everyday life. I witness how with humor and wisdom you can have any kind of topic look so simple and applicable to small or large businesses and move them into action. Thank you again. I highly recommend your method to any individual or organization that wants to improve and go forward in their personal or global goals."
